

Wheelabrator Technical Center

Welcome to the Wheelabrator Group Technology Center – a solution center for your blast cleaning and shot peening needs.

This resource continues to serve as the center of excellence for determining the best cleaning and peening application solutions. Strengthened by innovative advancements, the center will assist Wheelabrator customers by utilizing new technology to enhance productivity.

The Technology Center assists in enhancing performance characteristics of different blast wheels and applications. The technological gains are applied to both our new equipment solutions and equipment modernization programs.

Wheelabrator Group takes your project to the next level. The Technology Center is a valuable tool for our customers, giving them the practical means to evaluate their surface preparation solution. End users have traditionally acknowledged the superiority of Wheelabrator® surface finishing solutions and equipment. Wheelabrator Group looks forward to addressing your blast cleaning and shot peening needs.

Technology Center Features

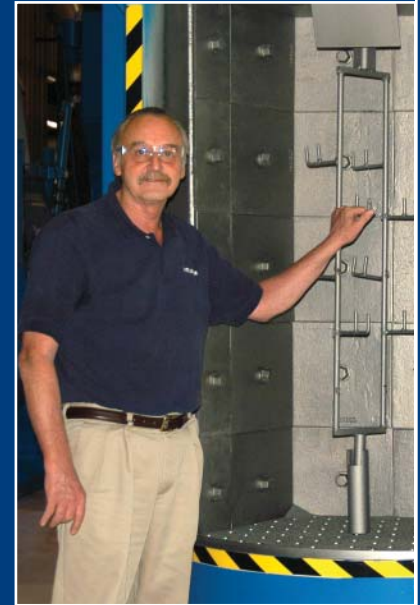

Seven different equipment types are dedicated to parts testing at the facility. The machines listed here are standard models, so you are able to see how a Wheelabrator Group equipment solution will perform in your manufacturing environment.

- Spinner Hanger machines
- Tumblast® machines
- Plain Table machines
- Wire Mesh Rotary Table
- Inline Wire Mesh Belt (four wheel and eight wheel configurations)
- Manual blast cabinets
- Automated Airblast Cleaning/Peening Machine

For those highly customized applications with: complex material handling, excess size constraints, exact wheel or nozzle position replication, or even specific part movement that can not be replicated in one of our standard models. Wheelabrator Group has equipped it's Technology Center with a highly customized piece of equipment capable of simulating a host of other machines. Here are a few examples of machine types that have been simulated previously:

- Skew Roll
- Car Table
- Pipe Machine
- Swing Table
- Structural Machine
- Ram Cage
- Monorail
- Airblast peening and cleaning

Developing cost effective surface preparation solutions for our customers is our responsibility. Be sure to schedule a visit and work with our experienced technology team.

Ron Barrier - Technical Center Manager,
 34 Years of Demonstration Experience
