

Wheelabrator Rubber Mill Conversion

Extend the versatility of your current steel mill Tumbblast® machine by converting it to a rubber mill. Ideal for die castings and plastic parts, the rubber mill is the perfect fit for current Tumbblast machine owners.

Available for a variety of Wheelabrator® models and similar competitive machines, the rubber mill conversion kit can be installed with a minimum amount of downtime and inconvenience.

The rubber mill conversion kit features a ribbed, heavy duty, multi-ply, abrasive resistant, rubber belt that cushions the parts and minimizes damage during tumbling. Because there are no over-lapping flights and a minimal number of pinch points, part jamming is dramatically reduced.

Features & Benefits

- Heavy duty, multi-ply abrasion resistant rubber belt
- Tumbling ribs on conveyor belt
- No overlapping steel flights
- No links and pins
- Multiple support rolls
- Banded front winged pulley
- External conveyor roll bearing take up
- Cushions parts for less tumbling damage. Ideal for die castings, plastic and other fragile metals.
- Improved part exposure to abrasive blast
- Eliminates flight pinch points for parts
- Fewer replacement wear parts required.
- Reduce part jamming under the barrel head
- Eliminates abrasive build up under front roller
- Easier tracking adjustments

Implementation

- 27" x 36" Tumblast (5 cu. ft. capacity)
- 7 cu. ft. Super I Tumblast
- 36" x 42" Tumblast (11.5 cu. ft. capacity)
- 14 cu. ft. Super II Tumblast
- 14 cu. ft. Super I Tumblast
- 22 cu. ft. Super I Tumblast
- 22 cu. ft. Super II Tumblast
- Competitive rubber mill conversion assemblies available in a wide range of sizes
