

**Have you considered upgrading your current blast equipment?**

Wheelabrator Plus offers Equipment Modernization Programs (EMP) for wheel blast equipment. The technological advancements made by the Wheelabrator Group Research and Development personnel are available for your non Wheelabrator equipment. Many EMP projects include the latest EZEFIT® wheel technology.

**What are some of the advantages of upgrading to new technology?**

By upgrading to new wheel blast technology you will experience substantial improvements that will include many of the following:

- Reduced operating costs
- Minimized machine down time
- Improved manufacturing efficiency
- Reduced maintenance time costs

# Wheelabrator Plus Parallel Parts

Complete line for non Wheelabrator blast equipment.

**Why choose Wheelabrator Plus for your wheel blast solutions?**

Wheelabrator Plus is the after-sales division of Wheelabrator Group and provides a full range of services, replacement parts, training and equipment upgrades to all blast equipment users, whether your machine is manufactured by Wheelabrator Group or a different manufacturer.

Wheelabrator Group is the global leader in surface preparation technology with a full range of wheel blast and automated air blast solutions. The Wheelabrator Technology Center, established over the years as the center of excellence, provides the ability to simulate your blast cleaning and peening process to meet your application needs. We have the latest technical resources, and our engineering personnel utilize the latest 3-D modeling technology for speed and accuracy while meeting customer schedules.

Wheelabrator offers an extensive line of wheel parts for major brands that include Pangborn®, Sinto and Blastec® just to name a few.

**Parallel Parts**

For more than 20 years Wheelabrator has supplied a complete line of Wheelabrator replacement parts and non Wheelabrator parallel parts.

Our Parallel Parts offer you the simplicity of a single supply source for your most critical needs and the assurance of guaranteed fit, form and function in every part.

- Stock inventory of high usage wear parts
- Most stock parts ship same day
- Non-stock cast and fabricated parts availability
- ISO certified Quality Management

Parallel parts wheel kits are available, and they include a balanced set of blades/vanes, control cage, impeller and mounting hardware.

We carry a stock of more than 4,500 different parts to ensure that we can get you the part you need when you need it.

To order your Parallel Parts Catalog, please call 1-800-544-4144

**Are you optimizing your cleaning needs?**

Our Wheelabrator Plus factory trained technicians can provide:

- Productivity Solutions
- Scheduled inspections / preventive maintenance for all blast equipment
- Parts installations
- Emergency service
- On-site equipment training
- Equipment modernization assessment
